

Department of Zoology

The zoology department of Nutan Mahavidyalaya was established in the year 1968 at Nutan Vidyalaya a sister concern of our institute. Department was then shifted to the premises of main college campus building.

Laboratories:-

Department has a spacious building which was constructed under UGC assistance. It consists of two Laboratories No.1 is assigned to junior college and Laboratories No.2 for under graduate students. It also has preserved animal museum, store room, office of head of department and room for staff. Each laboratory is of 22*40 feet in dimensions which is sufficient for 25 students working together in single practical batch. Laboratory is well furnished with the facilities such as continuous

running water,L.P.G.gas line equipment chemicals tools and dissecting animals models etc.

Chemicals & Equipements etc:-

Department has ready stock of chemicals ,glass wares equipments required for U.G. students. Department is very much great full to U.G.C. for providing financial assistance for procurement of equipments etc.Although department is sufficient to carry out minor research projects due to lack of P.G. course research work could not be undertaken.Beside equipment department has stock of numerous charts, LCD Projectors ,microscope etc.Department routine purchases to like chemicals glassware materials i.e.recurring and nonrecurring materials.

Staff:-

Zoology department of Nutan Mahavidyalaya started in 1968. Zoology department built up area is 225 sq.m. *Mr.N.G.Karadkhedkar* was the first Head of department. *Dr. P.N.Kulkarni* is lecturer and head department of Zoology up to 2003 The present faculty includes the Dr. R.M.Khadap Head from Jan.2007 in the department with Helminthology specialization & Dr.P.S.Kharat with specialization Animal Physiology . Both faculty member is actually engaged in the academic and research aspect as recognized guide for Ph.D. of S. R. T. M. U., Nanded .

Aims & Objectives :-

As with all branches of modern science Zoology too has witnessed evolutionary changes in last few decades mainly due to advances in the techniques and the knowledge base has increased tremendously.

Presently the subject takes in to account the advances in the field of Zoology, especially in understanding life processes of animals, inter relationship with the species and between larger group, the evolutionary process at work. This will help students to give better understanding of animal structure and function. The subject is framed in such a way which will also help the students to master necessary skills useful for acquiring necessary information, interpretation, the phenomenon at

work, the collection and the analysis to process the data for arriving at a meaningful conclusion.

The subject also proposes to students for teaching jobs and self employment (e-g. Apicultural, Piscicultural, Sericultural, Biofertilizer etc.) the subject also aims at developing identification skills, culturing skills, animals handling skills, communication skills and observation skills etc.

Vision

- Fostering global competencies among the students.
- Provide Global platform to the students in the area of Life Sciences.
- Provide acquaintance about fascinating world of animals and fishes and their applications.
