“Report on the Visit to IIMR Medical College, Badnapur Dist. Jalna”

Date: January 24, 2020

Place: IIMR Medical College

Students Participants: 55 B.Sc.,

Faculty Participants: 3 Faculty Members

Introduction:

On January 24, 2020, a group comprising 55 B.Sc. students accompanied by 3 faculty members visited the IIMR Medical College in Badnapur, Dist. Jalna. The purpose of the visit was to provide students with insights into medical education, healthcare facilities, and advancements in medical science.

Activities:

• **Welcome and Orientation:**

Upon arrival at the IIMR Medical College, the group was warmly welcomed by the college administration and staff. An orientation session provided an overview of the college's history, infrastructure, academic programs, and healthcare services.

• **Guided Tour of Facilities:**

Students were given a guided tour of the college's facilities, including lecture halls, laboratories, library, and medical wards. They observed various aspects of medical education and healthcare delivery, gaining insights into medical training and patient care.

• **Interactive Sessions:**

Interactive sessions were conducted with faculty members and medical students, allowing students to ask questions and engage in discussions on topics such as medical curriculum, clinical training, research opportunities, and career prospects in the field of medicine.

• **Clinical Observations:**

SELU, Dist. Parbhani

Students had the opportunity to observe clinical procedures and patient consultations in different departments, including the outpatient department (OPD), emergency room, and diagnostic imaging center. This provided them with a first-hand experience of medical practice and patient care.

• **Educational Presentations:**

Educational presentations were delivered by faculty members on various medical topics, such as anatomy, physiology, pharmacology, and pathology. These presentations aimed to enhance students' understanding of basic medical sciences and their relevance to clinical practice.

Aims and Objectives of the Excursion Tour to IIMR Medical College, Badnapur Dist. Jalna

Aims:

- **First-Hand Experience:** To provide students with a first-hand experience of the facilities and operations of a medical college, enhancing their understanding of medical education and healthcare delivery.
- **Supplementation of Theoretical Knowledge:** To supplement the theoretical knowledge gained in classrooms with practical exposure to medical sciences and their applications in healthcare.
- **Exploration of Healthcare Sector:** To explore the role of medical colleges in training healthcare professionals, conducting medical research, and providing healthcare services to the community.

Objectives:

- **Educational Tour:** To organize a guided tour of IIMR Medical College, allowing students to observe and learn about the college's infrastructure, academic programs, and healthcare facilities.
- **Clinical Observations:** To facilitate clinical observations in different departments of the medical college, including outpatient clinics, inpatient wards, and diagnostic facilities, providing students with insights into medical practice and patient care.
- **Interactive Learning:** To organize interactive sessions with faculty members and medical students, enabling students to ask questions, engage in discussions, and learn about medical curriculum, research opportunities, and career prospects in the field of medicine.
- **Educational Presentations:** To arrange educational presentations by faculty members on various medical topics, such as anatomy, physiology, pharmacology, and pathology, enhancing students' understanding of basic medical sciences and their relevance to clinical practice.
- **Career Exploration:** To introduce students to potential career opportunities in the healthcare sector, including roles in medicine, nursing, allied health professions, and medical research.
- **Integration of Classroom Learning:** To integrate the knowledge and concepts learned in botany classrooms with real-world observations and experiences in the field of medical science, fostering interdisciplinary learning and understanding.

Overall, the excursion tour aims to provide students with a comprehensive learning experience that combines theoretical knowledge with practical exposure to the healthcare sector, enhancing their understanding of medical sciences and their applications in healthcare delivery and patient care. It seeks to inspire students to pursue further studies or research in medical science and to contribute to the improvement of healthcare services in their communities.

Conclusion:

The excursion tour organized by the Department of Botany, Nutan Mahavidyalaya, Selu, to IIMR Medical College, Badnapur, Dist. Jalna, on January 24, 2020, has successfully achieved its aims and objectives of providing students with a comprehensive understanding of medical education, healthcare delivery, and the role of medical colleges in the community. Through guided tours, clinical observations, interactive sessions, and educational presentations, students gained valuable insights into the facilities, operations, and academic programs of the medical college. They had the opportunity to witness first-hand the complexities of medical practice, patient care, and medical research, enriching their understanding of medical sciences and their applications in healthcare. The excursion served as a platform for students to explore potential career opportunities in the healthcare sector and inspired them to pursue further studies or research in medical science. It fostered interdisciplinary learning and understanding by integrating botanical knowledge with real-world experiences in the field of medical science. The Department of Botany extends gratitude to IIMR Medical College for their hospitality and valuable contributions to the educational experience of the students. The excursion has provided students with valuable insights and experiences that will contribute to their personal and professional growth, empowering them to make meaningful contributions to the healthcare sector and society at large.
